Net Near You	\$2,500	\$0.50	\$8,500	\$0.71

* Users are in the Database for the life of the network, no reoccurring charges

** Reoccurring monthly Cost

*** Assuming 1000 new signups per month, one logon per user, 12 month period and 12,000 total users total per year and \$100,000 Revenue

Testimonials

Dear All-City Wireless,

I just wanted to take a moment and let you know that we will be using the Wirect gateway on future projects. The platform has performed above our expectations. The platform has demonstrated a high degree of stability. It was extremely easy to set up and the report fields and user options are quite thorough.

We looked at several other options and the Wirect platform offered the best alternative from both a feature rich product and the overall value. It was as near to a true plug and play as device as we have experienced.

In addition, your support staff has been great to work with and provides best in class support. We are fully confident in recommending the platform to all of our clients. Great product and a great team! Keep up the good work.

To Whom It May Concern,

The City of Greenville installed a Nortel Mesh solution back in May 2007 as a pilot to provide citizens and visitors free WiFi access in Uptown Greenville NC for economic development. After several months of the installation we discovered that city council wanted to see how the investment was going and we discovered that the Nortel solution had no reporting capabilities. We then discovered that AWI had a solution that would provide us reporting and much much more like ftp, dhcp, radius & visual mapping of the AP transit links. We then proceeded with the purchase of the WiDirect by AWI and it has made our management of the Nortel Mesh a breeze. Listed below are some of the things that have made our purchase of the AWI box worth mentioning to others.

- First of all the Engineers are very knowledgeable of the Nortel Mesh.
- Second they are easy to contact and provide proactive support.
- Third the WiDirect has provided us with the tools necessary for reporting and managing our mesh network.
- Finally they are constantly upgrading the software and adding new features.

Thanks For All You Do,

- Freddie M. Wilkins, Jr, *Telecommunication Analyst – IT Dept.*
City of Greenville

I have had great results with the WiDirect product. The support staff at All City Wireless has been able to provide services that were above and beyond expectations. The product is very versatile and very powerful for the solution that it provides. I have looked at many products similar and none of them provide the same type of service and reliability for the price.

Here you go I could probably have written a book but I didn't want to go overboard. Hopefully this meets your needs. If not tell me more specific what you would like me to touch on and I will.
