The AllCity Wireless WiDirect provides a scalable and simple way to deploy, sell, and manage wireless networks. The WiDirect monitors and controls the entire user experience from registration and purchase, all the way to internet access, which allows you to focus on your business instead of the network. All the services you need are built into a single box which reduces complexity and increases manageability.

The WiDirect Client Technology grows with your network, which allows you to easily deploy new distributed wireless networks while maintaining a single management point with the same user base. As your network grows to new locations, new WiDirect client machines handle the increased demand. The WiDirect is ready to manage your network today.

*Additional Subscriber Licenses available

**with optional components
